Technique for cable laying and overhead line construction

- Energy cable laying up to 680 kV
- Fibre optic, mini and micro cables
- Cable winding and length measuring
- Overhead line construction up to 110 kV
- Seminars and product instructions

Moving equipment, mech.

Moving equipment for mechanical lift of the winding machine and for displacement by a hand draw bar.

- The moving equipment exists of the following parts:
- Loose hand steering pole with two polyamide wheels
- On the opposite side the machines are equipped with two fixed polyamide wheels
- The retrofitting of this equipment is not possible
