Technique for cable laying and overhead line construction

- Energy cable laying up to 680 kV
- Fibre optic, mini and micro cables
- Cable winding and length measuring
- Overhead line construction up to 110 kV
- Seminars and product instructions

Cable winding units stationary

Cable winding units stationary or for mounting on vehicles etc. For drums up to 3.0 t. This special unit is especially prepared for a drum drive through the centre shaft of the drum. With this drive heavy cables loads can be safety lifted and lowered. Only customer selected steel drums will be fix mounted and cannot be replaced by a standard cable drum. On demand different steel drums can be supplied, which can be replaced in the KTU 3 ZE within 3-4 hours. Please ask for a more extensive offer.

- Mainly used for lowering and lifting of cables and hoses in shafts and ground drillings.
- Through this high lifting and lowering forces can be safely controlled.
