Technique for cable laying and overhead line construction

- Energy cable laying up to 680 kV
- Fibre optic, mini and micro cables
- Cable winding and length measuring
- Overhead line construction up to 110 kV
- Seminars and product instructions

Cable and wire length measuring machines with mechanical counter

Cable and wire length measuring machines with mechanical counter without data storage, for stationary applications. Very robust steel construction. Due to the big perimeter of 1 m, high accuracy of ± 0,5 %, accuracy class III, at temperatures of 5-40°C.

Without conformity assessment. May only be used for purely internal use, not for sales of cables. Conformity assessment procedure according to Module F1 is possible, which allows direct sales of cables.

- Types MZ ... only for insulated cables, types MZ ... S also for bare metal goods.
- The accuracy refers to a calibrated cable of a length of at least 10 m.
- Measuring machines for cable bigger than Ø 60 mm are available on request.
- In the winding machines DTR/TR/TRG the electronic pre-set counter is installed as standard.
